

Human Rights Advocacy for Women in Afghanistan

As all governments, human and international societies are undoubtedly aware of the horrific wave of violence and gravely inhumane crimes against women, men and a large number of people who have been instituted to ethnic minorities in Afghanistan. You also know that the main cause of these violence and crimes is the Taliban terrorist group, which has been designed as a tailor-made plan and with the high support of the United States and their international allies, the under the name of "Peace Deal" in Afghanistan.

The continued killings of innocent people such as Zahra Abdullahi and civil society activists, especially women who protested, were suppressed and their disappearances by this group such as Tamana Pariani and Parwana Ebrahimkhel. And people who don't think because the Taliban don't think, the hegemony of beliefs that take its legitimacy from the Stone Age. In addition, to the further expansion of the rigid right to work and the freedom of women, which is half-part of the society. The descent, unemployment and poverty reflected in the sale of children by their parents are all the result of Taliban terrorists coming to power in Afghanistan. The fact is that the international supporters of the Taliban are as responsible for the killing people in Afghanistan as the Taliban. Unfortunately, the intellectual men of Afghan society also fell into a blackout, leaving Afghan women who want freedom alone in this human rights struggle! In fact, shutting down is itself supporting this terrorist and anti-human rights group. Supporting the Taliban and governments based on descent and imposing traditional beliefs and reactionary beliefs on the people has no relations with any of human standards. Crocodile tears shed on people's this Sad day in Afghanistan while supporting the continued power of Taliban terrorists is opportunistic and grossly inhumane.

Inviting Taliban leaders, whose names are still on the Human rights of wanted terrorists list, to a country in the European Union (Norway) committed to protecting human rights and equality of men and women in all social matters, to ignore and sacrifice the most basic human rights at the feet of the Taliban's sovereignty in Afghanistan by justifying the Taliban's cultural relativity or Afghanistan is extremely reactionary and profoundly inhumane.

We know that the Taliban's re-dominance of Afghanistan is not the result of miscalculations by U.S. leaders and their Western allies or the result of the Taliban's practical and mental capabilities. The Taliban's re-dominance is a continuation of the policy of supporting and expanding political Islam, which has been made possible in the lap of capitalism, the consequence of which is the multidimensional tragedy that all Afghan citizens, particularly women and children, suffer from.

In accordance to these facts, we are appealing to the Officials, Human and Women rights activists, civil society Organizations and the Authorities of the European Union:

- 1- Peace and prosperity are the phenomena that Afghan citizens have longed waiting for. Peace is not merely a shutdown of war (which has not been realized under Taliban control). It is not possible to realize the peace of the people in Afghanistan with the hegemony of Sharia law and rule based on descent. Afghan citizens want peace in Afghanistan where they will not have to pay off the Taliban in order to survive, and for women's freedom thoughts not to be violated by their captivity and civil rights.
- 2- Recognition of the Taliban's Islamic Emirat means recognizing the continuation of people's suffering in Afghanistan and for women. In addition to seriously calling for the failure to recognize the Taliban's Islamic Emirat and the end of Talibanism, we strongly demand that Taliban representatives and leaders be brought to international courts as war criminals. And this anti-human rights government will never be recognized.
